

**In the Claims:**

***Please cancel claims 1-18 without prejudice or disclaimer of the subject matter recited therein, and substitute therefor the following new claims:***

19. (New) An aggregate of electronic components comprising:

one substrate having an upper surface and a lower surface;

at least one upper electronic component provided on the upper surface of the one substrate, said upper electronic component having electrodes that are formed on first side surfaces of the one substrate; and

at least one lower electronic component provided on the lower surface of the one substrate, said lower electronic component having electrodes that are formed on second side surfaces of the one substrate, wherein the second side surfaces do not have the electrodes of the upper electronic component.

20. (New) An aggregate of electronic components as claimed in claim 19, wherein the upper and lower electronic components are resistors.
